## **County Employment and Wages in Ohio — First Quarter 2018**

All 13 of Ohio's large counties reported employment gains from March 2017 to March 2018, the U.S. Bureau of Labor Statistics reported today. (Large counties are defined as those with employment of 75,000 or more as measured by 2017 annual average employment.) Assistant Commissioner for Regional Operations Charlene Peiffer noted that Delaware County had the largest increase, up 1.9 percent, followed by Franklin County, up 1.6 percent. (See [table 1.](#))

Nationally, employment advanced 1.6 percent from March 2017 to March 2018, as 314 of the 349 largest U.S. counties registered increases. Midland, Texas, had the largest percentage increase with a gain of 12.6 percent over the year. Kanawha, W.Va., had the largest over-the-year percentage decrease in employment among the largest counties in the U.S., with a loss of 1.4 percent.

Among the 13 largest counties in Ohio, employment was highest in Franklin County (744,300) and Cuyahoga County (715,600) in March 2018. Four other counties—Hamilton (510,500), Summit (262,800), Montgomery (253,600), and Lucas (207,300)—had employment levels of more than 200,000. Collectively, Ohio's 13 large counties accounted for 65.1 percent of total employment within the state. Nationwide, the 349 largest counties made up 73.1 percent of total U.S. employment, which stood at 144.6 million in March 2018.

Average weekly wages increased in all of the 13 largest counties in Ohio from the first quarter of 2017 to the first quarter of 2018. Lucas County had the largest percentage increase in average weekly wages, up 5.7 percent, followed by Stark County (4.6 percent). (See [table 1.](#)) Hamilton County recorded the highest average weekly wage among the state's large counties at \$1,209, followed by Delaware County (\$1,205). Nationally, the average weekly wage increased 3.7 percent over the year to \$1,152 in the first quarter of 2018.

Employment and wage levels (but not over-the-year changes) are also available for the 75 counties in Ohio with employment levels below 75,000. Wage levels in all of these smaller counties were below the national average in the first quarter of 2018. (See [table 2.](#))

### **Large county wage changes**

As noted, average weekly wages rose in all of Ohio's large counties from the first quarter of 2017 to the first quarter of 2018. Wage gains in five of the state's large counties placed in the top half of the national ranking: Lucas (5.7 percent, 23<sup>rd</sup>), Stark, (4.6 percent, 51<sup>st</sup>), Warren (3.5 percent, 124<sup>th</sup>), and Cuyahoga and Franklin (both 3.0 percent, 172<sup>nd</sup>). (See [table 1.](#))

Nationally, 336 of the 349 largest counties had over-the-year increases in average weekly wages. Peoria, Ill., had the largest wage gain, up 23.8 percent from the first quarter of 2017. Suffolk, Mass., followed with an increase of 12.1 percent.

Of the 349 largest counties, 13 experienced an over-the-year decrease in average weekly wages. Forsyth, N.C., had the largest percentage decrease in average weekly wages (-4.8 percent), followed by Washington, Ark. (-3.1 percent).

### **Large county average weekly wages**

Hamilton County's average weekly wage of \$1,209 was the highest among the state's 13 large counties and ranked 73<sup>rd</sup> among the 349 largest U.S. counties. Delaware County (\$1,205, 75<sup>th</sup>) also reported an average weekly wage above the national average of \$1,152. Mahoning (\$747) reported the lowest average weekly wage among the state's large counties and ranked 340<sup>th</sup> nationwide.

Among the 349 largest U.S. counties, 259 had average weekly wages below the national average in the first quarter of 2018. Cameron, Texas, reported the lowest wage (\$628), followed by Horry County, S.C. (\$631), and the Texas counties of Hidalgo (\$657) and Webb (\$690).

Nationwide, 90 large counties had average weekly wages at or above the U.S. average of \$1,152 in the first quarter of 2018. New York, N.Y., had the highest average weekly wage at \$3,087. Santa Clara, Calif. (\$2,651) was second, followed by San Mateo, Calif. (\$2,606); San Francisco, Calif. (\$2,485); Suffolk, Mass. (\$2,268); and Somerset, N.J. (\$2,078).

### **Average weekly wages in Ohio's smaller counties**

All 75 smaller counties in Ohio with employment below 75,000 had average weekly wages below the national average of \$1,152. Among these smaller counties, Hancock had the highest average weekly wage at \$1,118, while Meigs had the lowest at \$576. (See [table 2](#).)

When all 88 counties in Ohio were considered, all but 2 had wages lower than the national average. One reported average weekly wages less than \$600, 10 had wages from \$600 to \$699, 32 reported wages from \$700 to \$799, 27 had wages from \$800 to \$899, and 18 had wages of \$900 or higher. (See [chart 1](#).)

### **Additional statistics and other information**

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit [www.bls.gov/cew](http://www.bls.gov/cew).

*Employment and Wages Annual Averages Online* features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2017 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2018 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2017* are now available online at [www.bls.gov/cew/cewbultn17.htm](http://www.bls.gov/cew/cewbultn17.htm). The 2017 edition of *Employment and Wages Annual Averages Online* will be available in September 2019.

---

**The County Employment and Wages release for second quarter 2018 is scheduled to be released on Wednesday, November 21, 2018.**

## Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 10.0 million employer reports cover 144.6 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at [www.bls.gov/cew/](http://www.bls.gov/cew/); however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
